Subject: B Reactor Cleanup

I am a member of the B Reactor Museum Association and strongly urge support for Hazard Mitigation for Public Access.

B Reactor represents a landmark in U.S. history that should be accessible to future generations. I have a number of acquaintances, some now deceased, who participated in B Reactor startup and operation. And I am proud to have been personally involved in design, construction, operation and process control for a number of the Hanford reactors from 1950 to 1960. I look forward to the day when I can show my family members how we made plutonium for atomic weapons.

Thank you - Carl Higby
